Policy & Systems Working Group

Laura Lyman Rodriguez, USA
Nicki Tiffin, South Africa

International 100K Cohort Consortium

Mission

To forge cohort connections that revolutionize population health science by providing sustainable data infrastructure, cultivating a collaborative research environment, and

promoting policies and best practices that foster connectivity, interoperability, and reciprocity.

Values

We are
INTENTIONAL

- *Focus on building*
- *Communicate & disseminate our work widely*

We have
INTEGRITY

- *Transparency, fairness, respect*
- *Basis for the trust*

We embrace
DIVERSITY

- *Global and inclusive*
- *Reciprocity in learning*

We strive for
EQUITY

- *All cohorts & colleagues excel*
- *Enhance the capacity*

We act with
AUDACITY

- *Tackle difficult challenges to make progress*
- *Encourage innovation*

Strategic Directions

Demonstrate the IHCC Approach Leads to Impactful Science

Enable Discovery and Connectivity of Cohorts for Collaboration

Make it Possible for All Cohorts to Contribute to IHCC Science Challenges

3. *Promote the development and/or adoption of policies and best practices and enhance cohort capabilities and competencies to improve the practice of collaboration*
2. Facilitate cohort discoverability and *data access* by enhancing IHCC's Atlas
1. Provide *“proof of concept”* that IHCC generates impactful science through ambitious scientific projects that require scale and diversity and improve health for all

Action Plan – Pragmatic Framework

“Coordinate with other working groups”

Local Collaborate with & facilitate progress in IHCC Projects

Community Topic specific advancement with & through other consortia

Enterprise Building resources and disseminating experience

Proposed 1-3 Year Goals

- Collaborate with other Working Groups to develop project policies and policy frameworks to streamline and promote collaboration and data sharing across IHCC activities
- Interface with and contribute to international efforts to address IHCC policy interests, *e.g.*, data access procedures, policy interoperability, pathways to address privacy regulations, etc.
- Assemble a “tool box” to promote capacity in IHCC cohorts and others around the globe to share data and collaborate to advance science and improve health for all

Breakout Questions

1. Is this an actionable framework and path forward to support IHCC's mission, values, and strategic directions?
2. Are these the right goals? What should be modified? What is missing?
3. What are the SMART translations for these goals?
